FOODCOLUMN EXECUTIVE BRIEFING • 2026 BENCHMARK SERIES

Restaurant Industry Statistics 2026: Executive Data Snapshot

Published: November 2026 | **Geographic Scope:** US & UK Commercial Foodservice | **Reference URL:** foodcolumn.com/resources/statistics/restaurant-industry-statistics-2026

EXECUTIVE SUMMARY: Commercial foodservice in 2026 is defined by digital ordering consolidation, elevated operational prime costs (58%–62%), and selective consumer visitation. Following U.S. Census Bureau benchmark revisions, the National Restaurant Association revised its 2026 nominal restaurant and foodservice sales forecast to **$1.36 Trillion** (down from an initial $1.55 Trillion projection on October 19, 2026). With off-premise mix sustaining above 54%, profitability hinges on self-service kiosk adoption (+14%–22% check lift), native loyalty app conversion (84%), and strict ingredient waste controls. This data snapshot synthesizes verified empirical benchmarks and operational metrics for restaurant owners, multi-unit operators, CFOs, and analysts.

1. Commercial Restaurant Financial & P&L Benchmarks

Metric	2026 Median / Benchmark	Target Range	Impact & Operational Context
Total Foodservice Market	$1.36 Trillion (NRA Revised)	Revised 2026 Forecast	NRA nominal sales forecast revised Oct 19, 2026 (down from $1.55T preliminary) following Census revisions.
Prime Cost (COGS + Labor)	60.5% of gross sales	58.0% – 62.0%	Primary solvency metric; operations above 65% face severe cash flow strain.
Cost of Goods Sold (COGS)	30.2% of revenue	28.0% – 32.0%	Fast casual: 28-30%; Casual dining: 30-33%; Seafood/Steakhouses: 32-35%.
Total Labor Burden	30.8% of revenue	28.0% – 34.0%	Includes wages, payroll taxes, healthcare, worker comp, and shift benefits.
Occupancy Cost (Rent/CAM)	6.8% of sales	6.0% – 8.0%	Drive-thru/compact prototypes maintain <6.0%; urban full-service up to 9.5%.
Estimated Operating Surplus	6.4% of sales	5.0% – 9.0%	Operating surplus from store revenues minus direct food, labor, rent & operating costs.

2. Digital Ordering, Kiosk & Off-Premise Performance

Channel / Technology Metric	2026 Observed Stat	Benchmark Scope	Strategic Takeaway
Digital Order Revenue Mix	44.0% of total QSR sales	US/UK Quick Service	Mobile app, web ordering, and ordering kiosk aggregate volume (Technomic).
Drive-Thru Revenue Share	68.0% of unit volume	QSR with Drive-Thru	Multi-lane & AI drive-thrus command majority store revenue (NRA Survey).
Self-Service Kiosk Check Lift	+14% to +22% check size	Fast Casual / QSR	Visual add-on prompts and specialty drink attachments expand basket value.
Native App Checkout Conversion	84% conversion rate	Brand Mobile Apps	Outperforms mobile web browsers (62%) by 22 absolute percentage points.
3rd-Party Delivery Commission	15% – 30% per order	Marketplace Orders	Spurring 62% of multi-unit chains to incentivize native app delivery channels.

3. Labor Productivity, Turnover & Operating Schedules

Labor Productivity Indicator	2026 Value	Target Benchmark	Source & Operational Benchmark Notes
Sales Per Labor Hour (SPLH)	$72 median ($95 peak)	$85.00 – $115.00	Peak rush target for fast casual; off-peak median $68-$75 (FoodColumn Benchmarks).
Annualized Separations Rate	72% (BLS JOLTS)	Sector-Wide NAICS 72	Annualized from monthly separations (~6.0%/mo) in Accommodation & Food Services. Sector-wide metric across lodging and dining; not isolated to kitchen line cooks.
Cornell Turnover Benchmark	$5,864 hotel sample avg	Lodging Benchmark	Tracey & Hinkin (2000) convenience sample of 12 US hotels ($3,383 line to $12k+ mgrs). Foundational framework; restaurant line cook impact estimated at $4k–$6k.
Kiosk Labor Reallocation	15 – 25 hours / week	Per store unit	Re-assigns cashier shifts to order expediting, drive-thru, and fresh food prep.
Turnover Automation Lift	-25% turnover rate	Operator Benchmark	Multi-unit case study: automated KDS and fryer filtration reduce kitchen turnover.

4. Consumer Dining Preferences & Menu Engineering

Consumer Trend Metric	Consumer Share	Margin Potential	Source & Menu Application
High-Protein Menu Demand	58% of active diners	High ($14–$18 bowl)	Explicit '30g+ Protein' callouts lift fast-casual entrée sales (Mintel Group).
Global Glazes & Flavors	64% adventurous trial	Standard COGS	Yuzu, harissa, hot honey, and gochujang premium attachments (Technomic).
Zero-Proof Beverage Attachment	26% of dinner parties	Exceptional (<15% pour)	Commands $8–$12 price point with gross margins exceeding 85% (CGA by NIQ).
Afternoon 'Snackification' Shift	42% of Gen-Z / Millennials	Incremental traffic	Mini meals between 2:00 PM and 4:30 PM capture 14% of daily transactions (Mintel).

5. Statistical Sources & Research Methodology

DATA SOURCES & CITATION METHODOLOGY:

• **National Restaurant Association (NRA):** *Restaurant Sales Volume Revised Lower Based on Benchmarked Government Data* (Oct 19, 2026 revision: $1.36 trillion 2026 nominal sales forecast vs previous $1.55 trillion projection following Census Bureau revisions; breakfast daypart share, drive-thru revenue share).

• **U.S. Bureau of Labor Statistics (BLS):** Job Openings and Labor Turnover Survey (JOLTS), Accommodation and Food Services (NAICS 72). Annualized total separations rate of ~72% (derived from cumulative monthly separation rates of ~6.0%/mo across all accommodation and foodservice staff; not isolated to kitchen line cooks).

• **Cornell University Center for Hospitality Research (CHR):** *The Cost of Employee Turnover: When the Devil is in the Details* by Tracey & Hinkin (historical lodging convenience sample of 12 hotels reporting $5,864 average turnover cost, ranging from $3,383 for entry-level to $12,000+ for managers; foundational cost framework, not an empirical restaurant kitchen study).

• **Technomic Inc.:** QSR Channel Mix Trends (44% digital mix), native app checkout conversion (84%), and Menu Monitor flavor trial databases (64%).

• **Mintel Group:** Consumer Food & Drink Studies (58% high-protein demand, 42% afternoon snackification).

• **CGA by NIQ:** US & UK Hospitality On-Premise Trackers (zero-proof craft beverage pour costs <15%, dinner party attachment 26%).

• **FoodColumn Operator Benchmarks:** Commercial restaurant prime cost median (60.5%), automation retention lift (-25% turnover in multi-unit case studies), and Sales Per Labor Hour (SPLH: $72 median, $85–$115 peak targets).

Methodology Note: Figures reflect aggregated medians from commercial operations and published sources. Benchmarks should be adjusted for concept type, location, and regional wage floors.
